

Cybersecurity Labor Shortage

The Fast-Growing Job with a Huge Skills Gap

Cybersecurity is at the forefront of today's business and technology priorities, driven by an alarming increase in cyberattacks and data breaches. Organizations are struggling to recruit skilled professionals to combat these threats, creating a **significant demand for cybersecurity talent**.

Key Industry Highlights:

- **Global Workforce Gap:** Cybersecurity Ventures projects **3.5 million unfilled cybersecurity jobs** globally by 2025, a figure consistent since 2021.
- **Employer Initiatives:**
 - **Microsoft** partnered with U.S. community colleges to train **250,000 cybersecurity professionals** by 2025.
 - **Google** is providing **100,000 Americans** with career training in privacy and security through its Career Certificate program.

Why the Shortage Exists:

1. **Complex Skill Requirements:** Organizations require professionals with broad technical expertise, deep security knowledge, and the ability to assess business risks.
2. **Regional Challenges:** Countries like the U.K. and Israel are especially hard-hit, with severe shortages of qualified professionals.

Landmark CyberTech Role in Closing the Gap:

At Landmark CyberTech, we are addressing this labor shortage by:

- Raising awareness about cybersecurity career opportunities, even for individuals from non-IT backgrounds.
- Providing **hands-on technical training, professional mentorship, and consulting services**.
- Empowering students to become proficient cybersecurity experts capable of addressing evolving threats.

By preparing the next generation of cybersecurity professionals, we are contributing to a safer digital environment for governments, corporations, and individuals.

Landmark CyberTech Solutions - Innovative Training, Real-World Skills, Empowering the Future of Cybersecurity
